

Bottle change update - Blood products

Further to our announcement in July 2010, we are pleased to let you know that our planned transition from glass bottles to plastic PET media bottles is almost complete.

We are now in the final phase of the changeover period, and by 1st July 2011 all bottled blood products will be supplied in PET media bottles.

Products:

Horse blood and sheep blood, defibrinated or in anticoagulants. See product codes below.

Proposed Change Date:

July 2011

Change Details:

Product containers will change from glass sirop bottles to PET media bottles (Nalgene product code: 342040-0250). Further information about the Nalgene bottles can be obtained from the following website:

www.nalgenepackaging.com and entering the product code,

or you may contact TCS Biosciences Ltd on +44 (0) 1296 714222 and ask for Steven Goodman.

Reason for Change:

The change is part of the TCS Continuous Improvement Programme.

Horse Blood Products Affected:

HB024, HB025, HB026, HB029, HB030, HB032, HB059, HB065

Sheep Blood Products Affected:

SB092

If this change will cause you any difficulties or concerns, please contact us immediately.
