

Distribution Agreement - Dyes and Stains

CellPath Ltd are pleased to announce our collaboration with TCS Biosciences.

In order to increase and improve our current range of histopathology consumables to our customers we confirm that a partnership agreement is in place, from 1st April 2011, to supply an enhanced range of TCS dyes, stains and embedding and mounting media into histopathology departments throughout the UK.

CellPath is looking forward to working with TCS and we believe that by offering a comprehensive catalogue of common and hard to find stains and stain kits, in both powder and solution, we will provide a valuable service to our customers.

TCS Biosciences will continue to manufacture products to the high standards expected, with sales and distribution carried out by the CellPath team. All orders placed directly to TCS Biosciences for histology products will be passed to CellPath for processing and supply.

For more information or to receive our latest catalogue please email sales@cellpath.co.uk or contact Customer Care on 01686 611333.

TCS is a manufacturer of laboratory reagents, test kits and quality control reagents for histopathology.
