

TCS Biosciences Ltd Environmental Policy

TCS Biosciences Ltd manufactures and supplies diagnostic reagents for use in microbiology by commercial, pharmaceutical, research and medical organisations.

The Company manufactures high quality animal blood, serum products and freeze dried bacterial cultures as well as microbiological dyes and stains. It also procures externally manufactured products in order to offer customers a complete range of quality diagnostic and cell culture products.

TCS Biosciences Ltd is situated in the conservation area of the parish of East Claydon. As such we recognise our responsibility to minimise the company's impact on the local environment.

The company also recognises its obligation to minimise the impact of its activities on the national and international environment with continual improvement including prevention of pollution and reduction in consumption of non-sustainable resources.

To this end the company has formally identified its environmental aspects and impacts including a commitment:

- 1) To comply with all existing environmental legislation.
- 2) To identify, manage and wherever possible eliminate and reduce waste streams
- 3) To identify, manage and wherever possible reduce energy consumption and consequential carbon dioxide emissions
- 4) To continue to provide products and services which are beneficial to our customers and contribute to the current and future well-being of the public.

TCS Biosciences Ltd operates an Environmental Management System which complies with the requirements of ISO 14001:2004 for which BSI certificate number EMS 590359 has been held since June 2013.
