Social Responsibility***

**2026**

# Introduction

## Corporate and Social Responsibility

TCS Biosciences Ltd was founded in 1965 by Dr Alan Preston, with the purpose of providing clinical and industrial scientists with sterile animal blood and serum so that they could provide vital diagnostics services, produce vaccines and conduct vital research.

Today the provision of animal blood remains an important part of our business, however over the last 60 years we have diversified into supplying a wide range of biological raw materials for the manufacture of plated media and In Vitro Diagnostics (IVD) tests, reagents and diagnostics tools for the provision of clean and safe drinking water, reagents consumables and systems for food microbiology and raw materials for the production of life saving human and animal vaccines.

We remain a privately owned, family run business. We strive to provide products of the highest quality, to deliver outstanding service and value for money.

Truth, trust, and integrity are among our core values which are supported by our Business Management System (ISO19001:2015) and Environment Management Systems (ISO14001:2015).

As a result of these management system certifications, we have numerous policies and procedures in place that ensure rigorous compliance with these standards .

We are proud to run an ethical and equal opportunity business, ensuring all current and prospective staff members are treated fairly, equally and are given the same opportunities for personal development.

We hold our accountable suppliers to the same high standards we employ ourselves, making certain that our supply base does not discriminate or employ slave labour.

We subscribe to the Atlas Citation platform, a third-party service that provides our HR and Health and Safety functions. They also maintain and issue our company handbook, which includes our equality and Diversity, Modern Slavery, Anti-Bribery and Sustainability, Environmental and Carbon policies and statements. Atlas have been providing these services nationally since 1995 and are ISO 27001 certified.

2025 saw TCS celebrate 60 years. We remain a committed and independent company. Our focus is to continue to grow this business, while focusing on our core business values and our social and corporate responsibility.

# Equality and Diversity Policy

## Statement

TCS Biosciences Ltd are committed to promoting equality, diversity, and inclusion in all aspects of our operations. We value and respect the diverse backgrounds, experiences, and perspectives of our employees, customers, and stakeholders. The equality and Diversity Policy outlines our commitment to creating a fair and inclusive environment, free from discrimination, harassment, and bias.

We believe in equal opportunities for all individuals, regardless of their ethnicity, nationality, religion, belief, age, gender, gender identity, sexual orientation, marital status or disability. All employment decisions, including recruitment, training, promotion, and termination, will be based on merit, qualifications, and skills.

We subscribe fully to the concept of diversity strengthening our business which engenders creativity, innovation, and collaboration.

Through our equal opportunities policy, we have created an environment where everyone feels welcome, respected, and valued for who they are.

The Company operates a zero tolerance policy when it comes to discrimination, harassment, victimisation or bullying in any form. Actions and behaviour that undermines the dignity or well-being of individuals based on their protected characteristics will not be tolerated.

This includes verbal, written, physical, or visual actions that create a hostile or offensive environment. All employees have a responsibility to treat others with respect and report any incidents of discrimination or harassment.

Appropriate training and development opportunities will be provided to all employees, enabling them to understand and embrace the principles of equality, diversity, and inclusion. Training programs will be regularly reviewed and updated to reflect changing needs and best practices.

Policies are communicated to all employees via the company handbook. Mechanisms for reporting discrimination or harassment have been clearly established. All reported incidents will be promptly and thoroughly investigated, and appropriate action will be taken.

TCS Biosciences Ltd always have and always will promote a working environment that ensures equality, celebrates diversity, and respects the rights and dignity of all individuals. We believe that by embracing the principles of equality and diversity, we can achieve greater success while ensuring positive workplace culture.

# Modern Slavery

## Statement

TCS Biosciences Ltd are committed to eradicating modern slavery in all its forms. We recognise that modern slavery is a global issue, and we have responsibility to ensure that our operations and supply chains are free from any forms of slavery or forced labour.

We have zero-tolerance to modern slavery in all its forms, which includes slavery, forced labour, human trafficking, and any other forms of exploitation.

TCS Biosciences does not tolerate any practices within our organisation or supply chains that infringe upon the fundamental human rights and dignity of individuals.

We comply with all applicable laws and regulations related to modern slavery and human trafficking, both domestically and internationally. This includes adherence to the modern slavery Act 2015 and any other legislation that aims to combat modern slavery.

Where required, we will work collaboratively with them to promote transparency and responsible practices throughout the supply chain.

Through regular risk assessment we will identify areas of potential modern slavery within our supply chains. Based on these assessments, we will develop and implement strategies to mitigate these risks, including the establishment of clear policies, procedures, and contractual obligations.

TCS Biosciences will provide education and training to our employees to raise awareness about modern slavery, its signs, and the importance of reporting any concerns. We will equip our employees with the knowledge and tools to recognise and respond to situations that may involve modern slavery.

Mechanisms have been developed so that any employer or stakeholder may report any suspected instance of modern slavery. Any reports will be treated seriously, and the appropriate follow-up actions, including the protection of those making the report, will be taken. We will prepare and publish an annual Modern Slavery Statement that outlines the steps we have taken to combat modern slavery. This statement will be accessible to the public, our stakeholders, and relevant authorities, demonstrating our commitment to transparency and accountability.

# Modern Slavery Act

accuracy and quality as a science

## Statement by Supplier of compliance to the Modern Slavery Act 2015

The undersigned senior representative of the company detailed confirm that the principles of "Modern Slavery Laws" are understood and confirm the company does not, or will not in the future, support or do business knowingly with any other party involved in any act of slavery, human trafficking, forced, bonded or child labour as defined in the Modern Slavery Laws and shall notify relevant parties as soon as I become aware of any breach or possible breach of Modern Slavery Laws.

# Anti-Bribery

## Statement

TCS Biosciences Ltd has always been committed to conducting its business with integrity, transparency, and in compliance with all applicable laws and regulations. We do not tolerate bribery and corruption of any shape or form. This position applies to all employees, contractors, partners, and any other individuals or entities associated with our organisation. Bribery in any form, whether offering, giving, receiving, or soliciting, is strictly prohibited. This includes both financial and non-financial advantages.

Any gifts, entertainment, or hospitality provided or received must be reasonable, proportionate, and within the boundaries of applicable laws and regulations. They should not be offered or accepted with the intention of improperly influencing business decisions.

The use of intermediaries or third parties to make or receive such offers are also strictly prohibited.

We remain committed to compliance with all relevant anti-bribery and anti-corruption laws, including but not limited to the United Kingdom bribery act, and local laws of the countries in which we operate.

Employees must familiarise themselves with the applicable laws and regulations and ensure their activities are conducted in accordance with them.

Any violations of laws or regulations related to bribery and corruption will be promptly reported to the appropriate authorities. We routinely refresh staff training so that we may identify and assess potential bribery risks associated with our business activities and relationships. Due diligence is completed prior to entering business relationships with third parties, such as suppliers, agents, and distributors, appropriate due diligence will be conducted to ensure their integrity and compliance with anti-bribery laws.

At TCS Biosciences Ltd, we encourage all employees to report any suspected or actual instances of bribery or corruption promptly. Any reports of suspected bribery or corruption will be treated with the utmost confidentiality, and appropriate measures will be taken to protect those reporting cases.

# Sustainability, Environment and Carbon

## Statement

Being based in a rural setting, we at TCS Biosciences Ltd are acutely aware of our responsibility to protect the environment, promote sustainability, and reduce our carbon footprint. Since 2013 we have been committed to operating our business in a manner that minimises negative environmental impacts, conserves resources, and contributes to a sustainable future.

We will comply with all applicable environmental laws, regulations, and standards, as well as any other standards and requirements to which we subscribe. We endeavour to exceed minimum compliance requirements whenever possible, seeking innovative solutions and best practices to reduce our environmental impact.

Since achieving ISO14001 in 2013, we have successfully reduced our environmental impact by minimising waste, maximising recycling initiatives while reducing emissions, consumption of water and the use of fossil fuels. We have focused on sustainable energy through the installation of solar panels and careful selection of our energy suppliers.

We will promote resource conservation throughout our operations by adopting practices that minimise energy consumption, water usage, and waste generation. This includes using energy-efficient technologies, implementing recycling programmes, and exploring sustainable alternatives for raw materials and packaging.

Through our carbon Essentials membership, we will continue to conduct regular assessments to measure and monitor our carbon footprint across our entire value chain. This includes quantifying emissions from our operations, transportation, and supply chain. These assessments will provide the foundation for further reduction targets and developing strategies to achieve them.

We continue to focus on reducing our greenhouse gas emissions and transitioning to a low-carbon economy. As part of this focus, we have formally committed to reduce our carbon to net zero by 2030 signing up to the science based initiative (SBTI). We will prioritise actions that deliver the most significant emissions reductions, such as energy efficiency improvements, renewable energy adoption, and sustainable transportation initiatives. We will also explore carbon offset programs to compensate for any remaining emissions.

Employee engagement and education are essential for achieving our sustainability and environmental goals. We will provide regular training and awareness programmes to empower our employees to contribute to our sustainability efforts. We will encourage them to adopt sustainable practices both at work and in their personal lives, fostering a culture of environmental responsibility.

Our aim is to publish an annual report, detailing our progress in achieving our sustainability and carbon reduction targets. In this document, we will publish our environmental performance and our future goals and initiatives.
